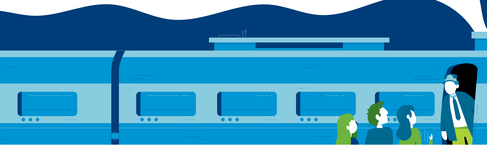
vmware

Taking the cloud management express train to greater business value

Count on vRealize to transport your critical application infrastructure safely and efficiently to accelerate the actions of your business



An open, extensible cloud management platform to get you on the right track

Only VMware provides a management platform with seamless visibility and control across existing infrastructure in addition to full support for all software-defined data center (SDDC) and public-cloud compute IT resources (including compute, network, and storage).

Customer testimonial

"VMware provided the most complete solution that was really built for the cloud era, versus other solutions that may have been retrofitted for cloud."

– Michael Leibnitzinski, Director of Private Cloud Engineering, Covance

Unlike the competition, VMware delivers:

Full view into SDDC health, configuration compliance, and native vSAN integration

Multi-cloud management, including VMware Cloud on AWS

A highly scalable platform that's extensible to physical, virtual, and cloud

Mitigate risk: time is money

Only VMware's built-in intelligence monitors all the resources necessary to keep your critical applications running at peak performance. Perform root cause analysis to drill down the stack and predict potential performance issues before they can negatively affect your business.

Unlike the competition, VMware delivers:

54% reduction in downtime of tier-one applications[1]

Up to **50%** reduction in time spent on root cause analysis [2]

75% reduction in unplanned downtime[3]

Enterprise troubleshooting: staying on the right track

VMware provides the transparency and visibility that lets you resolve problems faster and more efficiently.

Unlike the competition, VMware delivers:

360° view of all your IT data[4]

Up to **90%** reduction in time spent reviewing logs[5]

80% optimized utilization, with improved workload placement, troubleshooting, and capacity planning[6]

Intelligent workload balancing and capacity management: predictable scheduling to meet the needs of traffic

VMware delivers intelligent workload balancing and capacity management. Predictable scheduling helps you manage allocations to meet the needs of your traffic.

Customer testimonial

"For the first time ever, we're able to capacity plan, to look ahead and forecast what we're going to need for the next one, three, or five years."

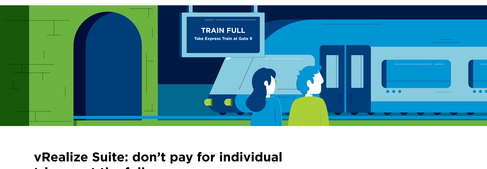
– Ricky Caldwell, Director of Server Operations, Architecture, and Infrastructure, Cornerstone

Unlike the competition, VMware delivers:

Up to **50%** reduction in downtimes of tier-one applications[1]

Up to **30%** reclaimed capacity[1]

20% improvement in operational efficiency[4]



vRealize Suite: don't pay for individual trips—get the full pass

Only VMware delivers a solution that provides all the features and functionality you need in one platform, saving you money over the costs of individual tools.

Unlike the competition, VMware delivers:

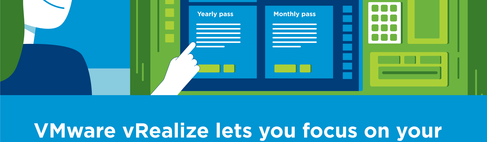
$1.4M[3] saved

70% reduction in manual tasks[4]

119%[3] ROI

Payback in **3 months**[3]

9x fewer migrations to achieve balance[6]



VMware vRealize lets you focus on your business—not your IT

Try the vRealize ROI calculator today to see how much you can save
