

# Ethernet

Whether you have multiple locations, are seeking to leverage today's bandwidth-intensive applications or want to bolster your business-continuity plans, Time Warner Cable Business Class **Ethernet Service** is a smart connectivity solution. Offering flexible network topologies, this advanced solution can cost-effectively and reliably power your WAN infrastructure to enable seamless collaboration between remote users and facilities – whether in metropolitan or outlying areas.

Rely on Time Warner Cable Business Class' Metro Ethernet Forum (MEF) Carrier Ethernet (CE) 2.0-certified Ethernet Service to power your evolving business.

## Scalable Bandwidth

- Flexible symmetrical bandwidth options from 512 Kbps up to 10 Gbps
- Delivered over our fiber-rich network with last-mile access to the Ethernet network

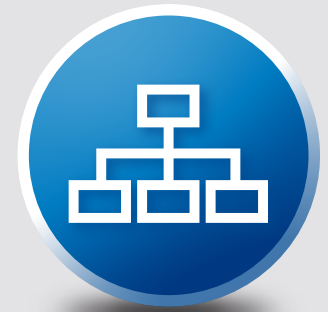

## Security and Reliability

- MEF CE 2.0 certified
- Stringent end-to-end Service-Level Agreement (SLAs) for Network Availability, Latency, MTTR and Packet Loss
- Available Managed Router Service provides Ethernet customers with a fully managed solution that reduces capital expenditure and ongoing maintenance time and cost
- 24/7 proactive network monitoring and award-winning support

## Platform for Growth

- More robust and cost-effective than frame relay, ATM and private line solutions
- Easily supports bandwidth-intensive applications such as VoIP, e-commerce and video-based solutions
- Nationwide network with service in metropolitan and outlying areas

# Ethernet

## MEF CE 2.0-CERTIFIED TOPOLOGIES FOR ANY BUSINESS

### Ethernet Private Line (EPL)

For businesses with two locations, EPL is a cost-effective, reliable, high-capacity business Ethernet solution. EPL connects Customer Premises Equipment (CPE) with a lower-cost User-to-Network Interface (UNI), making it a smart alternative to traditional TDM private line service.

### Ethernet Virtual Private Line (EVPL)

EVPL offers a reliable, high-bandwidth and cost-effective alternative to legacy TDM private line, frame relay or ATM service. It enables companies with a central office and satellite locations to communicate and collaborate seamlessly on one robust, secure network.

### Ethernet Local Area Network (ELAN)

Combining the privacy of traditional ATM/frame relay or private line service with the performance and resiliency of IP VPN, ELAN is ideal for connecting multiple campuses. Now widespread locations can share one seamless, secure network with the bandwidth to escalate productivity and efficiency to new levels.

## Comprehensive Solutions Working Together for Your Business

At Time Warner Cable Business Class we know the path to success begins with a deep understanding of your business challenges and requirements. That's why we have a dedicated account team that will work with you to carefully assess your needs – then recommend customizable, scalable and cost-effective solutions that fit your budget and help meet your growing demands.

Our complete suite of enterprise-class business solutions include **INTERNET, VOICE, TELEVISION, NETWORK SERVICES** and **CLOUD SERVICES** – enabling you to work with a single-source provider for all your needs. Backed by our advanced, fiber-rich network and competitive SLAs – you can count on reliable connectivity from a trusted partner.
