HP Performance Insight Report Pack module for HP Internet Services software

Data sheet

The HP Performance Insight Report Pack module for HP Internet Services software provides detailed information about the services that are critical to your business.

Gain insight—and increase performance

With the HP Performance Insight (PI) Report Pack module for HP Internet Services software, you can view historic metrics on service availability, response time and service-level violations on the most popular services that HP Internet Services software monitors.

You are able to understand the overall status of the services you provide, what response time and availability problems are likely to occur, the current status of your total service-level violations and where to apply resources to fix critically affected services.

Key features and benefits

Service Summary and Detail reports

- Daily Services Summary: Provides service summary for a given day showing service-level violations, availability, response times and throughput.

- Daily Probe Summary: Provides service detail by listing probe-to-target details for a given day and showing service-level violations, availability, response times and throughput.

Forecast reports

- Services Forecast: Lists the number of service-level violations, response time and throughput of each service monitored by Internet Services, with 30-, 60- and 90-day forecasts.

- Probe Type Forecast: Lists the response time, number of service-level violations and throughput of each probe type monitored, with 30-, 60- and 90-day forecasts.

Hot Spots reports

- Daily Service Hot Spots: Lists the ten services generating the worst response times, the worst availability, the most service-level violations and the worst throughput.

- Daily Probe Hot Spots: Lists the ten probes generating the worst response times, the worst availability, the most service-level violations and the worst throughput.

- Month-to-Date Service Hot Spots: Lists the ten services generating the worst response times, the worst availability, the most service-level violations and the worst throughput.

- Month-to-Date Probe Hot Spots: Lists the ten probes generating the worst response times, the worst availability, the most service-level violations and the worst throughput.

- Rolling 30-Day Service Hot Spots: Lists the ten services generating the worst response times, the worst availability, the most service-level violations and the worst throughput.

- Rolling 30-Day Probe Hot Spots: Lists the ten probes generating the worst response times, the worst availability, the most service-level violations and the worst throughput.

React faster to service issues

Through the reports in the HP Performance Insight Report Pack module for HP Internet Services software, you are able to make greater use of the data already collected and gathered by HP Internet Services. Use this data to react quickly to potential issues before they impact your service levels—so you can deliver greater value to the business.
