

Xerox® ConnectKey®  
Technology

# Xerox® ConnectKey® Technology

The right ecosystem for today's  
challenges and tomorrow's tasks.

 **WORK CAN WORK BETTER™** 

### It's the Xerox® Office revolution.

Our printers do more than simply scan, fax and copy. They're productivity powerhouses that help you get more done, faster.

With Xerox® ConnectKey® Technology, your multifunction printer becomes the center of a complete productivity ecosystem right out of the box.

Print from just about anywhere with mobile print services. Scan directly to cloud services. Use simple apps for complicated, often-performed tasks.

Transform the way you work. Join the workplace revolution with Xerox® printers and multifunction printers.

## Xerox® ConnectKey® Technology—simplicity redefined.

The ConnectKey Technology ecosystem is a combination of hardware and a common set of software, solutions and apps developed by Xerox and by our partners to improve the way you work.

### Solving Today's Complexities

Documents are the currency of business. They are at the heart of your critical workflows and drive almost every aspect of your business. When a group of IT managers, business managers and mobile workers was asked, 70 % said optimizing document flow would help them respond to market needs more quickly and 62 % said it would improve overall revenue\*. Why? Because improved employee productivity has strategic revenue-generating consequences. More productive employees spend more time on innovation, customer service, winning new business, and making your business more competitive.

Imagine an office environment where all print devices have the same core features and functionality, dramatically increasing adoption and providing a simplified user training experience with fewer mistakes and faster proficiency. The common architecture behind ConnectKey Technology features industry-leading security, highlighted by our groundbreaking partnerships with Intel Security and Cisco® to provide additional layers of security software and greater visibility to IT.

ConnectKey Technology-enabled solutions reduce waste and paper consumption, and give you time back in your day to do your job more effectively. Plus, compatibility with energy management solutions like Cisco EnergyWise and a mix of innovative features enable reduced power consumption so you can achieve your sustainability promises.

We've rounded out this amazing ecosystem by empowering today's mobile workforce to conduct business in ways that work for them. With scalable, cloud-ready mobile solutions and embedded apps that help with mobile printing and QR code pairing, we empower you and your entire organization to work better.

For more information, visit [www.connectkey.com](http://www.connectkey.com).

## Convenience for the way you work today.

**The four-walled, 9 to 5 office is a thing of the past.** Which is why multifunction printers with Xerox® ConnectKey® Technology offer mobile printing and scanning solutions that integrate fully with cloud-based technologies and direct communications to mobile devices.

### Connect and share everywhere.

ConnectKey Technology enables powerful, single-touch scanning workflows in various formats such as text searchable and single/multi-page PDFs. You can also scan and fax directly from your phone or tablet by connecting with our multifunction printers using Xerox® Mobile Link App. This app sends data to and prints data from cloud storage.

### Freedom in the office and room to roam.

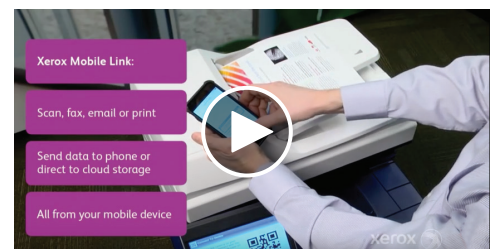

Smartphones and tablets are everywhere. You need a solution that's ready to connect to your on-the-go workforce. Xerox® devices built on ConnectKey Technology support a Wi-Fi Direct connection that lets you print from your mobile device without having to connect to a network.

Support for protocols like Apple® AirPrint™ enables users or guests to easily connect and print from their iOS® smartphones or tablets.

Use the Xerox® Print Service Plug-in for Android™ devices to print or the @PrintByXerox app, which uses just one universal email address to print to any ConnectKey Technology-enabled multifunction printer.

We also offer advanced options, like Xerox® Mobile Print or Xerox® Mobile Print Cloud, that enable secure, accurate printing from most mobile devices to any multifunction printer.

Learn more about why Xerox is the only choice for today's mobile professionals by visiting [www.xerox.com/mobile](http://www.xerox.com/mobile).

## You want to work faster and better.

**Your business operates at the pace of possibility.** Staying up to speed means having the right tools and solutions that empower you to get today's work done faster, and give you the tools you need to adopt new and better ways of working with your colleagues and clients.

### No more obstacles.

You need to quickly find and share your work for more effective collaboration, to move information into critical systems for faster decision-making and rapid response time. Xerox® ConnectKey® Technology enables features like the enhanced address book with favorites, which lets you seamlessly import your existing contacts and roll them out to multiple MFPs.

### Time-saving administration.

Whether you are a skilled administrator managing hundreds of devices, or one person managing a single device, Xerox gives you tools anyone can use to implement new workflow processes or other tasks. Onboard tools help you address potential issues, enabling multifunction printers built on ConnectKey Technology to stay more productive, longer. And when help is needed, speed is the key. That's why we put Online Support and

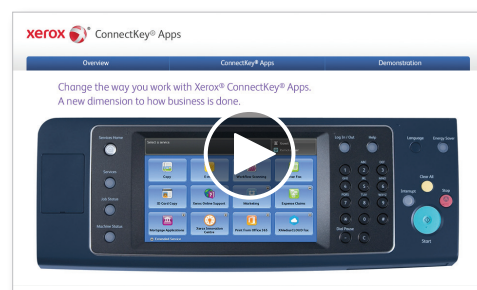

Embedded Help Videos that anyone can follow right on the front panel for fast assistance, and online help in our print drivers.

Our Remote Control Panel feature further reduces support and response times, enabling real-time training and troubleshooting from anywhere so you can resolve issues immediately and eliminate the need to wait for on-site visits.

### Customize your MFP.

ConnectKey apps allow you to easily connect your mobile workers to the device. Use the Xerox® App Gallery to download new apps that allow you to print from or scan to services, such as DropBox™, Google Drive™ and Microsoft® Office 365. ConnectKey Technology helps to streamline how your business deals with critical information—in-house or in the cloud.

To learn more, visit [www.xerox.com/AppGallery](http://www.xerox.com/AppGallery).

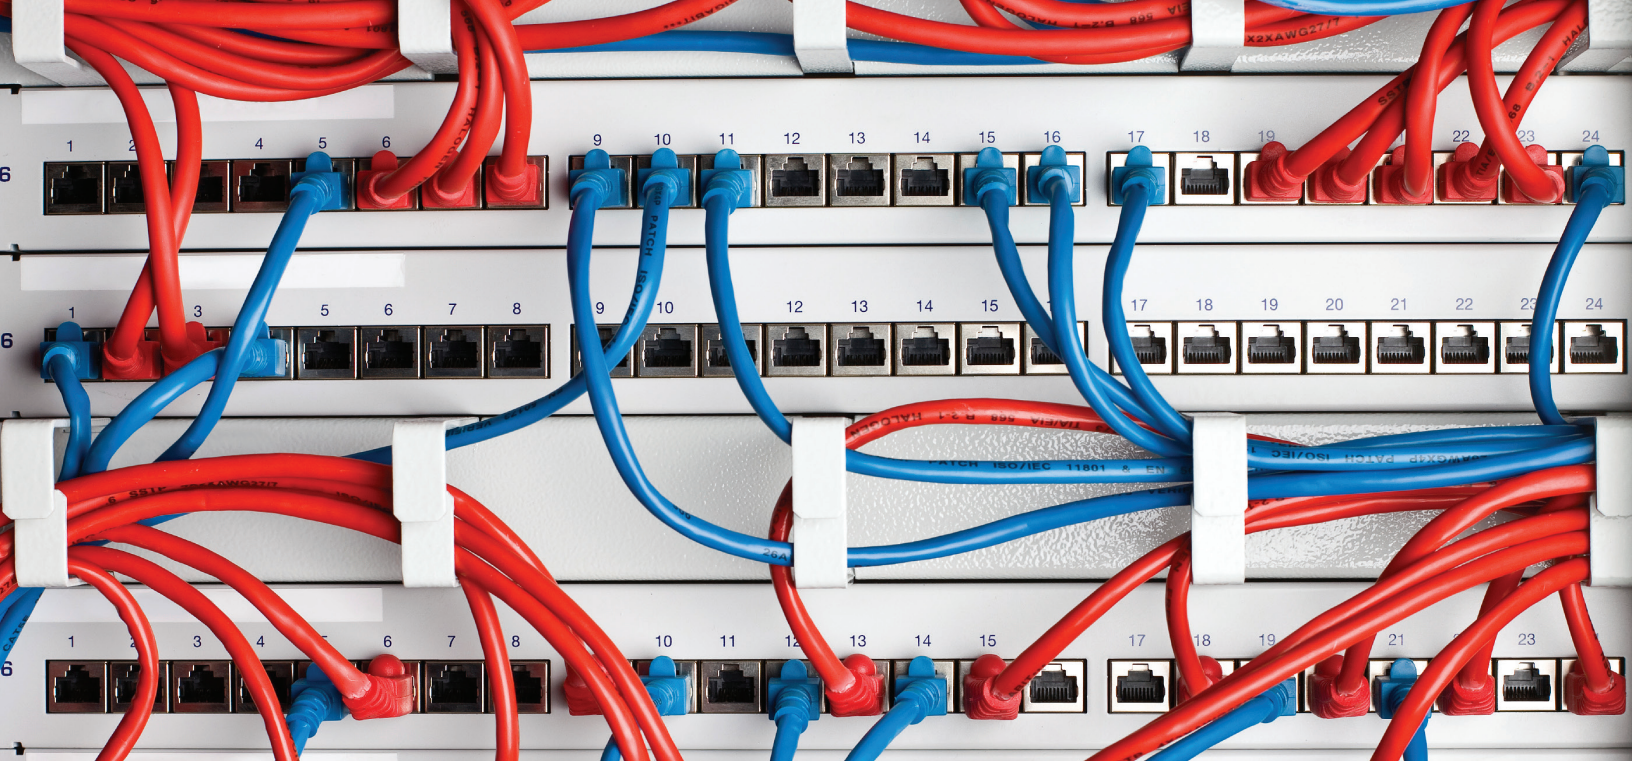

### Xerox® Easy Translator Service.

This optional service allows customers to scan a document and receive a translated print and/or email notification. Users can also send an image from an iOS or Android device, or a PC, that is forwarded for translation. For more information, visit <https://xeroxtranslates.com>

## Connect safely.

**Your data. Your business.** Making your device more accessible to all comes with risks. And while everyone realizes the need to safeguard their PCs with virus and malware protection, it's also critical to understand that multifunction printers are potential points of entry for malicious activities.

### Powerful Partnerships

Xerox® devices built on ConnectKey® Technology include McAfee® integration powered by Intel Security, resulting in the industry's first lineup of multifunction printers that protect themselves from potential outside threats. McAfee whitelisting technology ensures only safe, pre-approved files or functions are executed on your devices, minimizing the need to manually update software levels against new security threats. Also, seamless integration with the Xerox® Managed Print Services toolset and McAfee ePolicy (ePO) allows for easy tracking and monitoring.

Plus, automatic Cisco® TrustSec Identity Services Engine (ISE) integration provides comprehensive visibility of all of these MFPs' endpoints to enforce IT-centric security policies and compliance.

### More secure anywhere.

Xerox® ConnectKey® Technology provides the most comprehensive range of advanced features and technologies to help ensure your company's confidential information stays secure. Ready out of the box, our standard security includes features, such as 256-bit hard drive encryption, McAfee® protection powered by Intel Security and secure printing. Xerox also offers Xerox® PrintSafe software for affordable authentication that integrates with trusted industry cards/readers and pin access, to access nearly any printer in your secured print environment.

### Compliance with standards.

At Xerox, we believe comprehensive, multi-layer security that is easy to deploy and manage is a critical factor in the success of any business or organization of any size. Xerox® Technology is tested and validated to ensure protection against unauthorized access, and to keep your business compliant with standards across multiple key industries.

For more information about how Xerox helps make you more secure, visit [www.xerox.com/security](http://www.xerox.com/security).

## Real-world challenges, real cost savings with simple solutions.

**To thrive, you need to reduce costs where you can.** With Xerox, you gain an important competitive advantage with innovative tools to help you save time, control costs, simplify the way you manage printing in your office, and get a significant return on your investment.

### Convenience Authentication

Xerox® devices built on ConnectKey® Technology can be upgraded with optional solutions to deliver even greater cost control capabilities. They support many card reader technologies that enable users to log into the device using a proximity card, student ID, or security card, providing a secure method of authentication, tracking usage and billing.

### Saving you time so you can save money.

Whether it's out-of-the-box default settings like two-sided printing, our innovative Earth Smart feature, or the built-in technology that avoids a second pass of the print engine if only one page was sent, our new technology helps you control who prints what, when and how.

ConnectKey Technology evolves with your needs, starting with very simple controls, such as restricting usage and regulating color printing. The available User Permission control integrates with your internal authentication system—allowing you to prevent pre-determined or non-authenticated users from seeing specific features on the user interface, and to restrict color printing or single-sided documents universally or by application, time of day, or day of the week. And our Microsoft® Windows® print drivers give you the ability to save different settings per application, minimizing the need for your users to make changes and reducing the risk of potential errors.

### Reduced energy consumption for increased savings.

Xerox is a charter partner of the international ENERGY STAR® program, which means each new generation of Xerox® products offers more functionality and uses less energy—saving our customers money and reducing their carbon footprint.

Plus, MFPs built on ConnectKey Technology are compatible with energy management solutions such as Cisco® EnergyWise.

## Key ConnectKey Technology Features and Solutions Capabilities

<b>Convenience</b>	Standard	Apple AirPrint, Single Touch Scan, Xerox® Mobile Express Driver®, Mopria® Certified
	Free Download	Xerox® Print Service Plug-in for Android, Mopria® Print Service Plug-in for Android™, Xerox® Mobile Link App
	Optional	ConnectKey® for DocuShare®, Wi-Fi Kit, Xerox® Mobile Print, Xerox® Mobile Print Cloud
<b>Productivity</b>	Standard	Address Book Integration, Remote Control Panel, Application Defaults, Searchable PDF, Print Around, TWAIN Support, Scan to Home, Scan to Email, Scan to Mailbox, Cloning, Online Support from UI and Print Driver, Xerox® Global Print Driver®, Xerox® CentreWare® Web, Wi-Fi Direct with Optional Xerox® USB Wireless Adapter, QR Code App, Xerox® App Gallery App, @PrintByXerox App
	Optional	ConnectKey® Apps, Xerox® Scan to PC Desktop® SE and Pro, Foreign Device Interface Kit, Unicode Fonts Kit, Xerox® Easy Translator Service
<b>Security</b>	Standard	McAfee® Embedded, McAfee ePolicy (ePO) Compatible, HDD Overwrite, AES 256-bit Encryption (FIPS 140-2 compliant), SHA-256 Hash Message Authentication, Common Criteria Certification (undergoing evaluation), Encrypted Secure Print, Secure Fax, Secure Scan, Secure Email, Cisco® TrustSec Identity Services Engine (ISE) Integration, Network Authentication, TLS, SNMPv3, Audit Log, Access Controls, User Permissions
	Optional	McAfee Integrity Control, Smart Card Enablement Kit (CAC/PIV.NET), Xerox® PrintSafe Software
<b>Cost Control</b>	Standard	Print Policies, User Permissions, Xerox® Standard Accounting, Cisco® EnergyWise enabled by Xerox® Power MIB, Earth Smart Print Driver
	Optional	Equitrac Office®, Equitrac Express®, YSoft® SafeQ®, Print Audit and many other solutions by Business Innovation Partners

2014, 2015 and 2016 BLI Document Imaging Software Line of the Year Award
