

THE JOURNEY TO HYPER-CONVERGED STARTS WITH VXRAIL

Introducing the VCE VxRail™ Appliance, exclusively from EMC and VMware—a new hyper-converged infrastructure appliance designed to modernize your data center.

Turnkey SDDC Building Block

VxRail is the easiest and fastest way to stand up a fully virtualized VMware Software-Defined Data Center (SDDC) that integrates with existing tools and processes.

Start Small and Grow On-Demand

Buy just what you need and add nodes non-disruptively. Supports anywhere from 40 virtual machines (VMs) to over 3,000 VMs.

All Flash for Max Performance

2X more flash per node than any other hyper-converged appliance and modern data reduction for the best economics.

Fully Loaded with Rich Data Services

Includes a full suite of industry-leading data services from EMC and VMware, including integrated replication, backup, and cloud tiering.

Accelerate with Automation

Save costs by automating more than 200 tasks and increase operational efficiency by spending less time on software and hardware life-cycle management.

As trusted IT leaders in converged and hyper-converged, it's no wonder EMC and VMware are leading the way to modernized Software-Defined Data Centers.
