EMC DOCUMENTUM XCP
Solution Development Platform

ESSENTIALS

- Create scalable, repeatable case-based applications
- Develop applications up to 50 percent faster, at a substantially lower cost
- Unified design environment with an emphasis on configuration versus coding

AUTOMATE AND IMPROVE DECISION-MAKING

Escalating data and more complicated processes can slow the pace of businesses. With EMC Documentum xCP, your organization can create dynamic, cloud-based business solutions that transform decision-making. Documentum xCP lets designers, developers, and IT architects design and deploy solutions that bring new efficiency and agility to complex processes—from loan applications to benefit approvals.

Leveraging the latest advanced capabilities of the EMC Documentum platform, Documentum xCP accelerates development and deployment of powerful business solutions that cross a wide range of industries—and that streamline critical processes.

With Documentum xCP solutions, your organization can improve productivity, provide the highest levels of customer service, and evolve quickly as processes and priorities change. The latest, most powerful version of Documentum xCP provides new capabilities that transform your business and IT.

WORK SMARTER AND FASTER

It's simple. Documentum xCP solutions help you make effective decisions and drive better business outcomes. Now you can streamline information-intensive processes that draw information from multiple systems and sources—including Big Data.

Documentum xCP automates these decision-oriented and exception-based processes and puts all relevant information in context. But it's flexible enough to support human insight and expertise that's needed for effective case management.

Documentum xCP provides today's information workers with everything they need to work more efficiently, including a modern, intuitive user experience that puts key information at their fingertips. And with iPad and Android Tablet support, users can work from anywhere.

GAIN INTELLIGENCE WITH ANALYTICS

With its enhanced reporting capabilities, Documentum xCP embeds visual charts and dashboards anywhere within your xCP solution. Support for both content and process analytics enables you to detect patterns in information, search within your solution, and gain new business insights.

STREAMLINE KEY BUSINESS PROCESSES

Documentum xCP solutions support and streamline a wide range of business processes within financial services, insurance, healthcare, high-tech, energy, and public-sector agencies. They also bring new efficiency and accuracy to core processes, from invoice automation to contracts management to accounts payable. No matter how you use Documentum xCP, it simplifies and speeds processes and boosts productivity. And it helps ensure regulatory compliance by providing a complete record of all content, correspondence, and interaction—as well as full visibility into customer activity.

CREATE SOLUTIONS 50% FASTER

For designers and developers, Documentum xCP delivers xCP Designer, the industry's first unified solution design tool for creating and deploying customized cloud-ready solutions, faster and better.

This comprehensive design tool brings together information modeling, process design, user experience definition, dynamic report creation, comprehensive data services, and more—all in a single, easy-to-use environment.

Highly graphical, xCP Designer requires only composition—not custom coding—to create your solution, so it's much easier to make changes whenever you need them. And xCP can be easily integrated with any existing business systems within your enterprise.

Documentum xCP accelerates creation and deployment of solutions by up to 50%, while delivering breakthrough performance and scalability. And it empowers designers and developers to collaborate with business users to deliver solutions that meet their exact needs today—and that evolve seamlessly in the future.

START WITH READY-TO-DEPLOY SOLUTIONS

For the fastest time to value, EMC offers a solutions catalog of more than 80 Documentum xCP-based solutions from partners and the EMC Information Intelligence Group (IIG) in specific vertical industries. These proven, certified solutions get you up and running fast.

CREATE CUSTOM SOLUTIONS, QUICKLY

Documentum xCP's rapid application development environment lets designers and developers create custom, cloud-ready business solutions quickly and easily. And a growing library of xCP xCelerators, are available for free via the EMC Community Network, to help speed development of custom solutions even more.

DEPLOY IN THE CLOUD, OURS OR YOURS

You can choose to have your xCP solution deployed and managed meticulously by EMC experts within the EMC OnDemand managed services private cloud environment. EMC OnDemand accelerates deployment, provides complete support for maintenance and upgrades, and reduces downtime. This approach lowers your total cost of ownership (TCO) by 50% since you don't require your own infrastructure or IT staff.

You can also choose to deploy your solution in-house. With the xCelerated Management System (xMS), you can set up your entire xCP solution stack quickly within a VMware-based private cloud environment using configurable blueprints and automated provisioning. Improve supportability and flexible IT service delivery while getting users up and running within hours. xMS also delivers integrated system monitoring for increased manageability and operational efficiency.

No matter which deployment option you choose, our cloud-based approach provides a flexible, cost-effective way to raise productivity while lowering costs.

BE READY FOR THE FUTURE

Today's businesses evolve faster than ever. With Documentum xCP, you're ready. You can change your Documentum xCP solution to respond to new business needs. Scale seamlessly to accommodate more users, without more expense. As your solution evolves, you can be confident that it will continue to improve the quality of key decisions and outcomes—and deliver significant value and cost savings.

ABOUT EMC

EMC Corporation is a global leader in enabling businesses and service providers to transform their operations and deliver IT as a service. Fundamental to this transformation is cloud computing. Through innovative products and services, EMC accelerates the journey to cloud computing, helping IT departments to store, manage, protect and analyze their most valuable asset — information — in a more agile, trusted and cost-efficient way. Additional information about EMC can be found at www.EMC.com.
