

A Guide To Solid Ink Colour Printing

The Lowest Cost of Colour on the Market

Colour you can bank on

Finding a printing solution that strikes the right balance between cost, colour, functionality and sustainability is a challenge for many organisations.

It seemed that to have one feature, you had to sacrifice another. Until now.

Fuji Xerox Printers' ColorQube 8880 represents the latest in colour printing technology. But more than a colour printer, it's a workhorse that uses the latest technology to keep costs affordable, makes your office look good on paper, and reduces your impact on the environment.

An independent analysis* of 85 A4 and A3 colour devices in the Australian market place shows the ColorQube 8880 to have the lowest cost per colour page. It's not only the lowest cost per page, there's a significant 14% gap between it and the next lowest cost per page.

The ColorQube 8880 not only offers an incredibly low total cost of ownership, it also represents ongoing savings on consumables. The plans offered through Fuji Xerox's partner Managed Print Program, mean businesses can pay based on the amount of colour per page rather than for a full colour page.

That means no more paying expensive colour prices for pages using small amounts of colour. With the ColorQube 8880 three tier billing plan, you pay based on the amount of colour on the page. It classifies documents based on the actual amount of colour used – no more paying full-colour prices for low-colour documents. On most colour pages, your price will drop significantly.

* IPR (Independent Print Research) analysis of A4 and A3 colour laser devices as at 16 September 2015 across Australia and New Zealand. Comparison included 85 different devices.

It's a workhorse that uses the latest technology to keep costs affordable, makes your office look good on paper, and reduces your impact on the environment.

Exceptional colour quality on any stock

The ColorQube 8880 is cartridge-free, using Solid Ink sticks that are melted, producing exceptional documents and images.

This new technology allows you to print high quality documents with saturated colour, even on inexpensive office or recycled paper.

The Solid Ink sticks are very easy to refill, with uniquely shaped sticks to fit the correct slot for simple drop-in loading. Solid Ink can be topped up at any time, even when the device is running.

The vibrant, durable colour that can be achieved using the Solid Ink technology improves the appeal of colour documents and is ideal for organisations looking to achieve eye catching and memorable documents.

Speed:

- Fast Colour: Up to 51 pages per minute (ppm)
- Standard: Up to 30 ppm
- Enhanced: Up to 19 ppm
- High Resolution: Up to 6 ppm
- First-print-out time (FPOT) - As fast as 5 seconds colour

Ideal for organisations looking to achieve eye catching and memorable documents.

Features:

- Colour By Words
- Smart Duplex
- Earth Smart Driver settings
- Bi-directional drivers
- Booklet printing
- Watermarks
- N-up printing
- Graphical ink gauge
- Run Black

A printer that boosts office productivity

Did you know that 37% of small business staff lose up to two hours per week on printing related issues? That adds up to 100 hours each year, per staff member.

Much of the wasted productivity is lost to printers being used for other purposes. And that's not to mention the number of hours lost to toner replacement and servicing.

Printing in a busy office can be a tricky process – if a printer is out-of-toner, tied up with a large print run, or needs a service it means that print jobs can be stuck in print-queues. Staff will typically resend the job to another device, or simply wait until the printer is back on-line. The business suffers delays, or possibly even grinds to a halt, leaving staff frustrated and customers waiting.

With print and copy speeds of up to 51 pages per minute and a first page time out as fast as 5 seconds for colour, ColorQube 8880 users will experience minimal downtime waiting for jobs to complete.

The intuitive 'Print Around' feature enables active documents to be moved ahead of stalled jobs in the print queue.

Intelligent Ready technology learns a workgroup's usage patterns and aims to reduce user wait times by preparing to print in advance of peak usage periods. The ColorQube 8880 also allows users to choose the perfect combination of image quality and speed for any printing situation with four different print settings – High Resolution, Enhanced, Standard and Fast Colour.

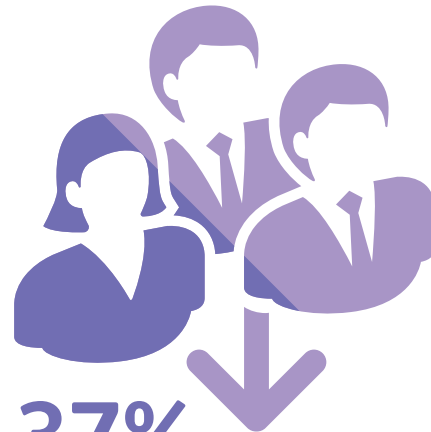

True Cost Savings

With the ColorQube 8880 you can afford to print all your documents in attention-grabbing colour.

Pay for the colour you use. With flexible pricing plans you'll stop paying expensive per-page prices for low-coverage documents.

Save shipping costs and storage space. Compared to toner, Solid Ink's smaller packaging costs less to ship and is small enough to fit in a desk drawer.

Spend less on paper and ink. Get standard two-sided printing and the N-up feature, which prints multiple pages on a single sheet.

37%

of small business staff lose up to **two hours per week** on printing related issues.

100 hours/year per staff member.

Create a more sustainable workplace

Not only can you enjoy the benefits of cost-effective colour printing, you can also contribute to your office's sustainability efforts as well.

With the ColorQube 8880, there are no more empty toner cartridges to replace or recycle.

Solid Ink sticks come with minimal packaging and generate up to 90% less printing waste when compared with comparable laser printers. In addition, over the product's lifecycle, less energy is required than comparable laser printers.

ColorQube's easy-to-use print-driver gauge allows you to choose the most environmentally conscious print settings. Intelligent Ready technology learns your work group's usage patterns and moves to low-power mode when you're least likely to use it. While Bundled GreenPrint software helps you print only the pages you want for reduced paper and ink usage.

The ColorQube offers unprecedented colour printing efficiency, representing the most environmentally friendly printing technology on the market.

The ColorQube offers unprecedented colour printing efficiency, representing the most environmentally friendly printing technology on the market.

A woman in a grey business suit stands between two piles of printer-related items. On the left is a small, neat pile of printer boxes labeled 'ColorQube'. On the right is a large, messy pile of printer boxes and many individual toner cartridges, labeled 'Colour Laserjet Printer'. The woman is gesturing towards the smaller pile, highlighting the difference in waste.

ColorQube

Colour Laserjet Printer

Total waste produced from printing 4,000 pages per month for 4 years:
Solid Ink: 10.5 kg; Laser: 204.5 kgs

The most versatile print options yet

Thought you could only print documents from your computer? Think again.

Using Fuji Xerox Print Back technology, the ColorQube 8880 allows you to print from your iOS and Android-based smartphones and tablets. If you're on the move around the office, print directly from your mobile device to the nearest printer. Never get stuck in a meeting without your agenda again.

Productivity Options

Productivity Kit Option 1

- Adds 2 GB RAM
- Secure Print
- Job Collation

Productivity Kit Option 2

- Adds 32 GB SSD Memory
- Store print job resources including: fonts, forms, Macros and colour tables
- Direct PDF Printing
- Saved Print
- Secure Print
- Proof Print
- Personal Print
- Personal Saved Print
- Enhanced Collation
- Saved Print History

Using Fuji Xerox Print Back technology, the ColorQube 8880 allows you to print from your iOS and Android-based smartphones and tablets.

Join our community:

Fuji Xerox Printers is a leader in printing and document technology, committed to helping small to medium businesses find a printing and document management device that saves money and time, and improves efficiencies.

We provide a vast range of high quality printers and multifunction devices and scanning solutions with the freedom of mobility, so you have greater control of documents, costs and productivity.

Our business partners help businesses of all sizes, including those working from a small home office find the right document management solution.
