

## A LIMITED TIME MANAGED SECURITY PENETRATION TESTING OFFER FOR YOUR NORTH AMERICA CUSTOMERS

---

### Buy Select Penetration Tests and Get a Retest Free of Charge

#### **What is an External Managed Security Penetration Test?**

An External Managed Security Penetration test is a quick and easy method to set up a managed security penetration test that is designed to give your client visibility into vulnerabilities within their network or web applications via Trustwave's cutting edge Fusion portal.

#### **Choose From Two Managed Security Pen Test Offers**

You can choose from **one or both** Managed Security Pen Test offers:

- 1x external network penetration test (up to 256 live IPs) with a free retest\*
- 1x external web application penetration test (up to 2 user roles) with a free retest\*

The client will be given access to our self-service portal to enroll and schedule the engagement with an industry-beating lead time. Once completed, the report will become available on the Trustwave Fusion platform which acts as a single pane of glass for the test results.

As a special offer, your client will also receive an in-kind **free of charge retest** for one or both purchased penetration tests to help in any necessary remediation efforts and better understand the improvements of their security posture. **Use these results to continue the discussion about your customer's additional cybersecurity needs, with the support of your Trustwave team.**

**Contact your Trustwave Channel Manager** today to ensure your clients don't miss out on this limited time offer. Please be sure you are registered for our PartnerOne portal to take advantage of the additional co-marketing and co-selling tools and resources provided with this sales acceleration play and offer. **[Log in \(or sign up\) here.](#)**
