

# 5 ways to expand patient-centered care

Consult, meet, and engage with Cisco Webex

## Simple and secure virtual care

Expand access to care with digital interaction.

Webex enables healthcare providers to extend patient reach, connect healthcare teams and experts, and collaborate with secure messaging and meetings.

## Use Webex to elevate telehealth

### 1 Connect with patients and experts face-to-face

Meet on video. With [Webex Meetings](#) and [Webex Teams](#) clinicians and care teams can meet remotely over video conference for patient consultations and experts for second opinions.

With [Webex Telehealth Connector](#), providers can engage with patients through Epic's Electronic Medical Record (EMR) platform using web browser (WebRTC) video.

See how healthcare provider [Head & Neck Pathology Consultations](#) experiences video conferencing with its patients.

### 2 Streamline collaboration experiences for efficient care

Connect with [Webex Teams](#). Call, video, chat, and file sharing provide continuous, real-time communication channels for the entire care team.

Utilize no-touch virtual exam rooms with [Webex and Samsung devices](#), saving time and personal protective equipment (PPE).

See how [Mountain Area Health Education Center](#) improved patient care.

### 3 Utilize interactive devices and apps for virtual communication

Leverage intelligent solutions. Use [Webex Board](#) and [Webex Desk Pro](#) to extend remote care and connect with other providers.

Place video and audio calls, whiteboard, and annotate content. Webex Rooms devices are customizable for healthcare settings and integrate with Webex Teams to work with anyone, anywhere.

See the new [Webex-powered telepresence robot](#) for video communication.

### 4 Consult with remote specialists and expand clinician training

Enhance clinical experiences. Collaborate wherever you are.

Available on any device, Webex enables easy consultations with remote colleagues and experts to gain further insights and training via Webex Expert on Demand.

Watch [East Carolina University School of Dental Medicine](#) utilize remote experts to provide dental care in rural areas.

### 5 Simple and secure telehealth

Security without compromise. Webex solutions are designed to help healthcare providers focus on what they do best.

We handle security, so you can focus on your patients. Webex has security built-in, not bolted on.

## It's a perfect time to innovate healthcare

### Clinical and administrative collaboration

Video calling enriches the telehealth experience

#### Expand patient care access

Real-time patient care team collaboration

Connect providers with remote experts

Frontline medical workers have the ability to check on patients

Expand training across teams and departments

Conduct a virtual clinical trial

- Video conference with patients
- Connect patients with remote experts
- Share images and files with patients
- Consult with patients through a web browser from their EMR/EHR and HMR
- Provide no-touch telehealth virtual care and initial screenings

Provide better care for more patients and deliver enhanced clinician experiences with Cisco Webex.
