# ATLASSIAN

Elevate cloud security with
Atlassian Guard Premium

Guard priority projects with data classification, quickly surface suspicious behavior with alerts, and take action with suggested remediations. Atlassian Guard Premium is a cloud security add-on that unlocks a full cycle of capabilities to protect valuable assets and stop threats before they become incidents.

PROTECT top-priority projects on Atlassian cloud by classifying content and enforcing policies to protect your most important data.

DETECT data misuse and suspicious behaviors proactively across Atlassian cloud with advanced auditing and centralized, actionable detections.

RESPOND immediately to anomalous behaviors and potential threats on Atlassian cloud with investigation workflows and suggested remediation steps.
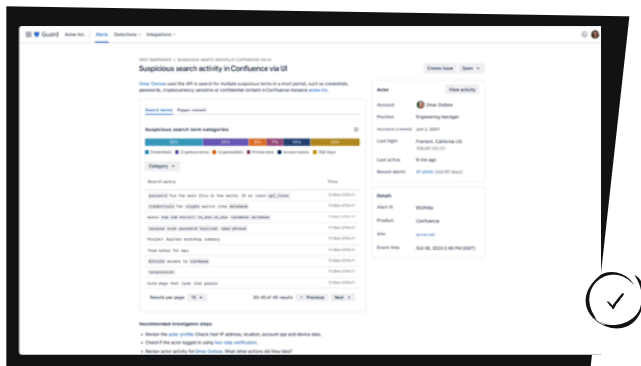

Atlassian cloud products supported by Atlassian Guard Premium

🎯 Jira   ❯❮ Confluence

Atlassian Guard Premium unlocks multiple migration blockers with the following information security capabilities:

1 Ability to identify, classify, and remediate leakage of sensitive data

2 Access to audit log recording all user activity

3 Control usage of API tokens and service/bot accounts

Features and capabilities

Atlassian Guard Premium defends mission-critical work, surfaces high-risk threats fast, and resolves them immediately. It includes all the capabilities in the Atlassian Guard Standard plan and also offers data classification, actionable detections and alerts, remediation workflows, and more robust audit logs.

PROTECT
against data loss proactively

- Enforced single sign-on (SSO)
- SCIM automated user provisioning
- Authentication policies
- External user security
- Enforced two-step verification
- Mobile app management (MAM)
- API token controls
- Data security policies
- Data classification
- Enforce data security policies by classification

DETECT
suspicious activity and data misuse

- Automatic product discovery
- Organization insights
- Comprehensive organization audit log: Admin and user activity, API tokens, webhooks
- Anomalous activity detections
- Content scanning
- Custom detections
- Detection controls
- SIEM integrations
- Alert messaging integrations

RESPOND
to threats before they become incidents

- Alert dashboard
- Alert details
- Actor profiles
- Remediation recommendations
- Remediation workflows
- Alert hand-off
