

LOOM FOR ATLASSIAN:

Record, share, and embed video across your Atlassian tools

Communication is simple, scalable, and more human with Loom.

JIRA

Accelerate and improve build cycles

- Report, test, and fix bugs
- Review pull requests
- Explain product requirements

Loom adds important visual context to code and bug reports. **Loom AI** has a direct connection to **Jira**, so you can create an issue — complete with essential console info — from within Loom.

CONFLUENCE

Unlock efficient content collaboration

- Provide status updates
- Summarize documentation in Confluence
- Deliver content feedback

Embed a video in your docs to share additional knowledge and clarity. Customers report that using Confluence and Loom together results in **2x faster onboarding** to new projects.

JIRA SERVICE MANAGEMENT

Speed up time to issue resolution

- Add visuals to support guides
- Resolve customer issues faster
- Support employees with video walkthroughs

Resolve customer issues faster when you add Loom videos to support tickets. Loom AI instantly drafts how-to guides and other customer docs to reduce future ticket volume.

“Loom is the best product on the market to support asynchronous communication. You can convey a lot of information in a short amount of time, reliably, with minimal effort. I can’t speak highly enough about it.”

Sean Stanley

DOCUMENTATION AND INTERNAL COMMUNICATIONS PARTNER (REMOTE)

So much more than a screen recorder

Share your message fast

Easily edit by transcript or stitch together video clips

Increase team connection

Add tasks, CTAs, comments, and emojis to your video

Personalize at scale

Record once and duplicate for many to boost engagement

Keep your content safe

SSO, SCIM, custom data retention policies and privacy settings

Loom helps companies reduce meetings for better collaboration and communication

↓ **29%**

less meetings

↑ **74%**

feel more efficient

↑ **64%**

feel more connected

Start and finish your workflow with Loom AI

Loom AI automatically enhances your videos, while instantly transcribing your recording and generating docs in 50+ languages.

✦ Instantly document information without drafting a word:

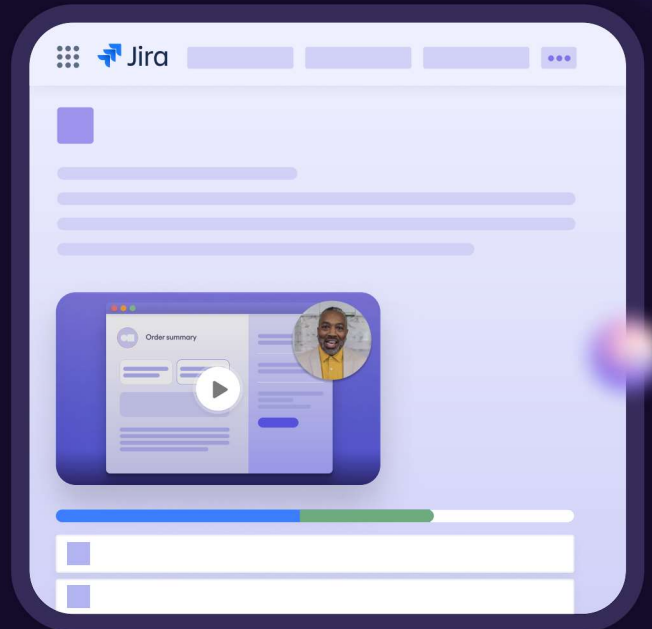

- Standard Operating Procedures (SOPs)
- How-to guides
- Pull request descriptions
- QA steps
- Code reviews

✦ Let Loom AI automatically draft your Jira issue:

- Report bugs in a few clicks
- Auto-drafted issue summary
- One click to open in Jira

✦ Pair your video with the perfect message, automatically drafted:

- For Slack or Teams message
- For email
