

AT&T Fleet Complete[®]

AT&T Fleet Complete is a unique fleet, asset, mobile workforce and dispatch management solution, which provides you with the ability to track and manage your vehicles, mobile workers and optimize your operations in a single cloud-based platform.

Competitive advantage

- **Track and manage your mission-critical fleet, assets and workforce** in real-time and make on-demand decisions to better serve your customers
- **Reduce fuel, maintenance and other operational costs** by monitoring vehicle engine's DTC codes and managing driver behavior
- **Provide outstanding customer service** with real-time status updates and notifications of arrival/departure
- **Reduce your company's carbon footprint** by dispatching the closest vehicle to the job and optimizing your routes

More than just fleet tracking

Powered by state-of-the-art GPS technology, the AT&T Fleet Tracker solution provides you with real-time visibility over your fleet location and vehicle diagnostics data. The AT&T Fleet Complete system turns this data into actionable business intelligence that will help you make smart decisions and efficiently manage your fleet.

The in-vehicle devices can be plugged into the OBD-II/CANBUS, J1939 or J1708 connections or hardwired into your vehicles and collect important information such as ECM status*, MIL sensor, ignition status, battery voltage and DTC codes*, as well as driver behaviors such as speeding, idling, harsh cornering/braking and rapid acceleration.

Advanced asset tracking

Designed specifically for tracking trailers and other assets, the AT&T Asset Tracker solution protects your business against unforeseen losses, lowers insurance costs, and helps you run your organization with confidence.

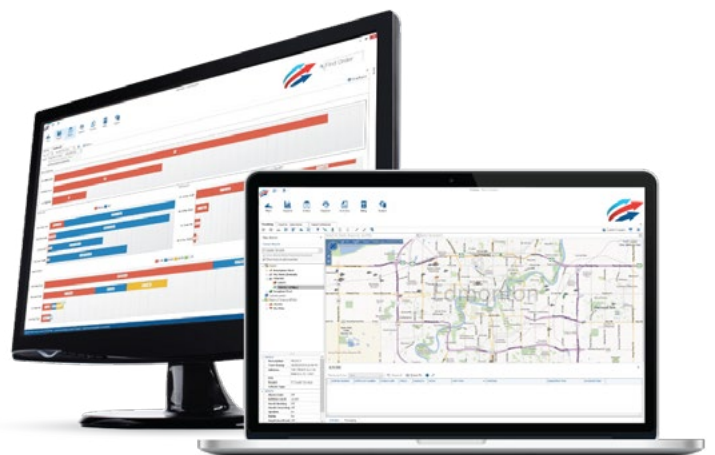

Instant communication with field staff

AT&T Fleet Complete with the AT&T Enhanced Push-to-Talk mobile resource management solution provides an efficient communication add-on to help improve fleet productivity and dispatch operations. Reach out to your field staff or hold a conference with multiple workers in the field with one click.

Extensive reporting

Analyze your business intelligence with the comprehensive power reporting and fleet dashboard, or schedule regular operational reports to get a detailed view of your fleet performance, whether captured from GPS, sensors, ECM*, events, or interactions of vehicles with Points of Interest such as service shop, gas stations, or any other location of interest.

- **Reports on asset activity** include such details as average speed, total distance, moving time, ignition status and can be used for comparing submitted worksheets vs real-life data.
- **Distance reports** cover the total distance traveled by an asset for a given time period, including distance traveled on private roads.
- **Idle report** logs how long assets spend not moving with ignition engaged. Along with power take-off usage report, can be used for accurate fuel tax reporting.
- **Speed reporting and notification** can be used to manage driver behavior and lowering instances of accidents and insurance premiums.
- **And more**, such as position, fleet performance, input, asset temperature, congregation and POI reports...

* Not available on all devices. Refer to your Fleet Complete regional sales manager for available options.

AT&T Fleet Complete features

Vehicle and asset tracking

- **Asset status:** travel direction, ignition status
- **Point of interest:** add/edit
- Locate closest assets
- Trip replay / breadcrumb trail
- **Custom layers:** LSD, private roads

Rules, alerts and reports

- **Driver behavior:** first ignition, harsh braking/cornering, idle, late departure, outside work hours usage, racing, rapid acceleration
- **Status:** distance, GPS lost, humidity, invalid GPS, crash detection
- **super rule:** trigger of combination of 2 rules together
- **operational reports:** engine status, fleet performance, maintenance, messages, POI, PTO usage, time card, trip, unknown movement, unvisited POIs, who was there

Dispatch & order management

- **Electronic order entry:** intelligent auto-populate, preferences
- **Dispatch:** dispatch to mobile device, find closest available vehicle
- **Job status tracking:** barcode scan, proof of delivery/task completion, signature capture

Billing & settlements

- **Customer account management**
- **Invoicing:** rate charts, fuel cost matrices, billable rates

Asset management

- **Vehicle information:** asset name, odometer, license plate, make, model, assigned work schedule
- **Additional sensors:** temperature, panic button, door/hood
- **Resources:** individual drivers and crews

Maintenance module

- **Unscheduled, annual, recurring date, rolling odo, etc**

Additional integrations

- **Satellite Failover:** coverage in areas out of cellular range
- **Hours of Service:** automation of HoS compliance

* Activation through KORE Wireless

Important Information
